

Stone Creek Camp

case study
By Shijing Zhu

Location: Bigfork, United States

Architect: Andersson Wise Architects

Owner: N/A

Year of completion: 2008

Climate: Warm-summer humid continental climate

Material of interest: Rock

Application: Exterior and interior

Properties of material: The materials and textures of these buildings connect them to the site. The effect is paradoxical: despite their size, the camp's large structures seem to emerge from the rock, wood, and grasses that surround them.
